GERARDO CIPRIANO

DevOps Engineer · Azure / Multi-cloud Specialist

DevOps Engineer with deep expertise across **Azure** and GCP ecosystems. Designs and operates Kubernetes clusters (AKS, GKE, on-prem), manages end-to-end CI/CD pipelines on **Azure DevOps** and GitHub Actions, and delivers modular **Terraform IaC** for enterprise multi-cloud deployments. Experienced in migrating legacy workloads to containerised microservices and in implementing GitOps practices with ArgoCD across diverse client environments.

SKILLS

Cloud & Kubernetes
Azure · AKS · Azure DevOps · ACR · GCP · GKE · Kubernetes on-prem

IaC & GitOps
Terraform (modular) · ArgoCD & Image Updater · Helm

CI/CD
Azure DevOps · GitLab CI · GitHub Actions

Scripting
Python · Bash · Go · Docker

Networking
Ingress · Gateway API · Azure Networking · DNS

Monitoring
Prometheus · Grafana · RBAC · Network Policy

Languages
Italian (native) · English (B2/C1)

CERTIFICATIONS

Google Cloud Associate Cloud Engineer
Valid 11/2023 – 11/2026

Azure Administrator Associate AZ-104

Microsoft 365 MS-100

Cisco CCNA

WORK EXPERIENCE

Cloud Engineer / DevOps Specialist

Dinova S.r.l. · Bologna | 09/2023 – Present

- Owned end-to-end **CI/CD lifecycle on Azure DevOps**, GitLab CI, and GitHub Actions across multiple client environments — hands-on experience with virtually all major pipeline platforms.
- Implemented **ArgoCD with Image Updater** in several production contexts, enabling GitOps-driven deployments from commit to production without manual intervention.
- Designed modular **Terraform IaC** for multi-cloud deployments (GCP, Azure), maximising code reuse and ensuring deployment consistency across projects.
- Migrated legacy VM workloads to **containerised microservices on AKS and GKE**; led Ingress → Gateway API transition with zero downtime.
- Created **Helm charts** for clients migrating to microservices architectures, ensuring rollback capability and environment-specific configurability.
- Optimised slow deployment pipelines using Python, Bash, and Go scripts; resolved critical CI bottlenecks across multiple client environments.
- Orchestrated **zero-downtime Kubernetes upgrade** from v1.24 to v1.30 in production.
- Explored **AI agent orchestration**, integrating LLM-based workflows into DevOps automation.

System Administrator

F.T.P. S.r.l. · Formigine | 07/2020 – 09/2022

- Managed virtual infrastructure: VMware ESXi, Hyper-V, Windows Server, Active Directory, DHCP/DNS, and Microsoft 365.
- Backup & disaster recovery (Veeam), firewall and antispam management.

IT Help Desk

GPI S.p.A. · Modena | 03/2018 – 06/2020

- User support, hardware/software troubleshooting, and incident ticketing.

EDUCATION

Bachelor's Degree in Information Systems Technology

Alma Mater Studiorum – Università di Bologna | 2021 – 2024

IT Expert Diploma – Telecommunications · IIS 'F. Corni', Modena | 2012 – 2017 · 92/100
