GERARDO CIPRIANO

Cloud Infrastructure Engineer · GCP / GKE Specialist

Cloud-native Infrastructure Engineer specialised in **GCP and GKE**. Designs and operates production-grade Kubernetes environments, implements GitOps workflows with **ArgoCD**, and builds modular **Terraform IaC** for multi-tenant SaaS workloads. Experienced in owning the full CI/CD lifecycle — from GitHub Actions pipelines to automated image promotion — with a focus on developer experience and deployment reliability.

SKILLS

Cloud & Kubernetes
GCP · GKE Standard & Autopilot · Cloud SQL · GCS / GCS Fuse · Certificate Manager · Cloud DNS

IaC & GitOps
Terraform (modular) · ArgoCD & Image Updater · Helm

CI/CD
GitHub Actions · GitLab CI · Azure DevOps

Scripting
Python · Bash · Go · Docker

Networking
Ingress · Gateway API · Load Balancers · DNS

Monitoring
Prometheus · Grafana · RBAC · Network Policy

Languages
Italian (native) · English (B2/C1)

CERTIFICATIONS

Google Cloud Associate Cloud Engineer
Valid 11/2023 – 11/2026

Azure Administrator Associate AZ-104

Microsoft 365 MS-100

Cisco CCNA

WORK EXPERIENCE

Cloud Engineer / DevOps Specialist

Dinova S.r.l. · Bologna | 09/2023 – Present

- Developed **modular Terraform IaC** for SaaS clients on GCP: GKE Autopilot clusters, Cloud SQL (shared/dedicated), GCS-backed storage via GCS Fuse (replacing NFS), Certificate Manager, and automatic DNS record provisioning — packaged as reusable Helm charts.
- Implemented **ArgoCD with Image Updater** in multiple production contexts, enabling fully automated GitOps promotion from CI build to live environment in a single click.
- Managed the complete **CI/CD lifecycle** across GitHub Actions, GitLab CI, and Azure DevOps; resolved pipeline bottlenecks using Python, Bash, and Go, achieving significant deploy time reductions.
- Led **Ingress → Gateway API migration** and application migrations between Kubernetes clusters with zero service disruption.
- Designed production-grade **Helm charts** for clients in microservices migration journeys, emphasising flexibility, scalability, and operational simplicity.
- Orchestrated **zero-downtime cluster upgrade** from Kubernetes v1.24 to v1.30 across on-prem and cloud environments.
- Managed GKE and Azure Kubernetes environments including storage, networking, registry, monitoring, alerting, and RBAC security.
- Explored **AI agent orchestration**, integrating LLM-based automation into DevOps workflows.

System Administrator

F.T.P. S.r.l. · Formigine | 07/2020 – 09/2022

- Managed virtual infrastructure: VMware ESXi, Hyper-V, Windows Server, Active Directory, DHCP/DNS, and Microsoft 365.
- Backup & disaster recovery (Veeam), firewall and antispam management.

IT Help Desk

GPI S.p.A. · Modena | 03/2018 – 06/2020

- User support, hardware/software troubleshooting, and incident ticketing.

EDUCATION

Bachelor's Degree in Information Systems Technology

Alma Mater Studiorum – Università di Bologna | 2021 – 2024

IT Expert Diploma – Telecommunications · IIS 'F. Corni', Modena | 2012 – 2017 · 92/100
